PREFACE

National Competency Standards (NCS) and curricula are essential elements for the implementation of a unified Technical and Vocational Education & Training System for Sri Lanka and forms the basis for the National Vocational Qualifications Framework of Sri Lanka, which provides for the award of nationally and internationally recognized qualifications. The National Competency Standards are developed in consultation with the industry and are designed using a nationally agreed specific format to maintain uniformity and consistency of standards amongst occupations.

The NCSs and curricula specify the standards of performance of a competent worker and the various contexts in which work may take place. NCS describes the knowledge, skills and attitudes required in a particular occupation and signals what students must be able to do in employment and can ideally serve as a link between education and training and the needs of the labour market. NCS and curricula together provide explicit advice to assessors and employers regarding the knowledge, skills and attitudes to be demonstrated by the candidates seeking formal recognition for the competencies acquired either following training or through work experience.

National Competency Standards focus on that is expected of a worker in the workplace rather than on the learning process.

- NCSs stress upon the ability to transfer and apply knowledge and skills to new situations and environments.
- In NCS and curricula the emphases are upon outcomes and upon the application of knowledge and skills, not just the specification of knowledge and skills.
- NCS and curricula are concerned with what people are able to do and the ability to do a task in a range of contexts.
- NCS and curricula include all aspects of workplace performance and not only narrow task skills.

NCS especially can serve a number of purposes including;

- Providing advice to curriculum developers about the knowledge, skills and attitude to be included in the curriculum.
- Providing specifications to Competency Based Assessors about the knowledge, skills and attitudes to be demonstrated by candidates.
- Providing advice to industry about job functions, which in turn can be used for the development of job descriptions, performance appraisal systems and work flow analysis.

The lead organization for the development of NCS and curricula is the National Apprentice & Industrial Training Authority. The standards so developed are endorsed by the Tertiary & Vocational Education Commission as National Document.

There is a requirement to review the standards and curricula within the prescribed period as appropriate as and when required, with the assistance of relevant industry groups and incorporate the changes in the National Competency Standards and Curricula.

H.A. Saththar
Chairman
National Apprentice & Industrial Training
Authority

Dr. K. A. Lalithadheera
Director General
Tertiary Vocational Education
Commission

ACKNOWLEDGMENT

Overall Direction	
Mr. H.A. Saththar	Chairman, National Apprentice & Industrial Training Authority
Dr. K. A. Lalithadheera	Director General, Tertiary & Vocational Education Commission

Occupation Outlook

Job Description

Graphic Designer is the person, who designs layouts, manipulates images, illustrates, visualizes conceptually, follows design principles, publishes and exports for the printing, technological, media & entertainment industry according to the customer requirement.

Graphic designer uses his/her artistic abilities to communicate ideas, inform consumers, and solve problems with visual concepts created by hand or by digital device to interpret the world through color, texture, images, and symbols. Graphic designers can be found in many industries and may be responsible for all aspects of a company's design process and might specialize in a particular field such as advertising, digital design, illustration, or branding, etc. Graphic designer can work independently as a freelancer or employed in a design studio, a creative agency, or a corporate company.

Responsibilities

Graphic designer creates posters, websites, logos, brochures, magazines and many other materials with multiple tools depending on the medium and goals of the final product to communicate ideas and information visually with a creative flair and a strong ability to translate requirements into design.

- Identify the design briefs and requirements.
- Plan the project and define the budget.
- Create concepts and visuals based on client's requirements.
- Create thumbnails/sketches and obtain the client's approval.
- Develop graphics and illustrations using appropriate software.
- Work individually or as a member of a team to produce final design within a particular time frame.
- Test graphics across various media and amend designs after feedback.
- Ensure final graphics and layouts to meet the client's requirement and according to technical feasibility.

Career and Employment Opportunities

Illustrator, Graphic designer, Image Manipulator, Web interface designer, Multimedia animator, Layout designer, Logo designer, Computer graphic artist, Package designer, Brand identity developer, Advertising art director, Freelance graphic artist, UI UX designer

**NATIONAL COMPETENCY STANDARDS
FOR THE OCCUPATION OF
GRAPHIC DESIGNER
(Competency Standards Code: D22S002)**

	List of Competency Units	Unit Code No.	Level	Page no:
1.	Develop concepts and sketches	D22S002U01	4	02
2.	Design and create graphics for print/publish products	D22S002U02	4	05
3.	Design and create graphics for web and other types of multimedia	D22S002U03	4	09
4.	Handle customer care service	D22S002U04	3	12
5.	Practice workplace communication and interpersonal relations	D22S002BU01	Basic	15
6.	Apply occupational literacy and numeracy	D22S002BU02	Basic	17
7.	Work in teams	D22S002BU03	Basic	19
8.	Practice occupational health and safety measures	D22S002BU04	Basic	21

Packaging for National Vocational Qualifications (NVQ)

- National Certificate at **NVQ Level 4** in the occupation of **Graphic Designer** will be awarded to those who are competent in U01 + U02 + U03 + U04 + BU01 + BU02 + BU03 + BU04 - **D22S002Q1L4**

Unit Title:	Develop concepts and sketches
Unit Descriptor:	This unit covers the competencies required to perform creative sketch based on client's requirements according to design principles
Unit Code:	D22S002U01
Elements of Competence	Performance Criteria
1. Obtain client's requirement	1.1 Client requirements identified through discussion and questions according to the design brief 1.2 Client's brief and gathered data documented and saved as per organization standards 1.3 Relevant details analyzed according to client's requirement (Materials, printing/publishing method, etc.)
2. Develop concepts	2.1 Inspiration re-searched for similar product or services 2.2 Target audience identified and ensured according to marketing elements 2.3 Different concepts and options identified according to client needs 2.4 Mind map created using the brainstorming techniques according to identified concepts and options
3. Develop sketch/thumbnaill	3.1 Draft sketch/s (story board) developed and suggested according to design principles 3.2 Client's consent for draft sketch obtained 3.3 Amendments / modifications made as suggested by the client 3.4 Client's approval obtained for designed sketch / thumbnaill

Range Statement:

Work connected to this unit may take place in office, studio or any other conducive place, work related to this unit may be performed individually or as a member of team.

Elaboration of Terms in Performance Criteria

- **Client's brief in PC 1.2** may include: Client contact details, product, service, target market, advertising message, client inspiration, budget and time duration
- **Marketing elements in PC 2.2** may include: product, price, place, promotion (4 Ps)
- **Design principles in PC 2.4** may include: consistency, legibility, clarity and meaningfulness of graphics

Critical aspects

The assessment must confirm that the candidate is able to;

- Use of proper design principles in drawing the sketch

- Gather accurate information
- Reflect customer's requirement through the sketch
- Use the correct file formats for presenting, exporting and saving
- Obtain the client's approval

The following tools, equipment & material are included within this unit.

Tools and equipment	Materials (Documents/References/Standards)
• Required Digital Devices (Computer, Tablets, Cameras, Scanners, Printers, etc.) • Internet facilities • Required Software (Vector / Raster graphic, etc.) • Online / Offline (Internal/External) storage devices • Presentations (Digital/Printed) • Concept development tools	• Stationery (Paper, Pencil, Colour Pencil, Ruler, Eraser)

The following documents /References/Standards may be used for this unit:

- Colour Guide
- Standard Operating Procedures (SOP)

Underpinning Knowledge and Skills

Underpinning Knowledge	Underpinning Skills
• Basic ICT knowledge • Graphic software knowledge • Design principles • Basics of sketching • Typography • Colour theory and psychology • Colour management • Substrate materials and sizes • Digital screen sizes and formats • File formats and exporting methods • Knowledge on project management • Concepts development • Elementary knowledge on cost and estimate • Knowledge on basic printing methods and processes • Language literacy	• Drawing and sketching skills • Creative thinking and writing skills • Presentation skills • Computer hardware and software skills • Artistic skills • Skills on selecting industrial accessories and materials • Client handling • Analyzing skills • Language skills • Communication • Teamwork

• Intellectual property and copyright law • Ethical use of concepts • Basic knowledge in ergonomics • Occupational health and safety	
---	--

Worker behavior/Attitude

Attitude/Behavior
• Speak clearly and politely with the client • Telephone/communication manners • Tolerate and negotiate with good manner • General norms of polite conduct • Clear writing and explanation on mother tong and English language

Unit Title:	Design and create graphics for print/publish products
Unit Descriptor:	This unit covers the competencies required to design and create the art work. It applies to the preparation of the designs for printing and publishing on substrate according to the approved design sketch
Unit Code:	D22S002U02
Element	Performance Criteria
1. Type manuscript	1.1 Manuscript typed using relevant word processing software 1.2 Unicode fonts and other font formats used as applicable 1.3 Online/offline fonts converted if required 1.4 Manuscript saved in appropriate file format 1.5 Manuscript checked by proof reader
2. Edit and enhance images	2.1 Appropriate software selected according to the artwork 2.2 Required size, colour, resolution and orientation selected according to the layout 2.3 Images edited/enhanced as per the required layout
3. Produce graphics and illustrations	3.1 Graphic software selected according to the requirement 3.2 Required size, colour mode and management, resolution and orientation selected according to the layout 3.3 Logos, illustrations, fonts gathered and prepared as required for the design and suitability for reproduction ensured 3.4 Images, graphics, fonts saved in a separate folder in appropriate file format according to organizational guidelines to be retrieved in printing and publishing process
4. Manipulate images and illustrations	4.1 Scanned images (using a suitable device)/downloaded/imported images with required resolution, retrieved 4.2 Colour mode and colour managed according to print design and output requirement 4.3 Images cropped according to required dimensions 4.4 Images processed using retouching, painting, adjustments, filters, effects etc. 4.5 Image masks prepared as required by design 4.6 Illustrations created/developed according to the sketch/thumbnaill 4.7 Images saved in a separate folder, in appropriate file format according to organizational guidelines to be retrieved in output process

5. Prepare print/publish layout design	5.1. Layout design software selected to suit print/publish 5.2. Layout format prepared according to print and publish process 5.3. Pre-set text imported or text keyed in for final print product 5.4. Text layout prepared according to design concept/product concept 5.5. Text formatted according to design concept/product concept 5.6. Images/graphics imported according to design concept/product concept 5.7. Colours applied and managed according to design concept/product concept 5.8. Final artwork archived in online/offline storage devices (preflight if necessary) 5.9. Quality of the artwork checked and ensured according to the design process and for printing/publishing 5.10. Client approval is obtained according to the developed artwork 5.11. Amendments performed if required 5.12. Artwork exported according to the relevant file formats
---	---

Range / Context:

Work connected to this unit may take place in an office, computer lab, or any other conducive place where the computer could be safely used. This work is carried out independently or in a team environment to predetermined standards of quality, safety and print procedures.

Elaboration of Terms in Performance Criteria

- **Image masks in PC 4.5** may include: could be alpha channel or clipping path
- **Print/publish in PC 5.1** may include: stationery, books, catalogues, newspapers, magazines, posters & banners, billboards & hoardings, logo designs, flyers, vehicle wraps, infographics, web and social media designs, signages, annual reports, cartoons, packaging, tags, labels, stamps & stickers, textile & garments, bottles & tumblers, canes & tubes, ceramic ware, UI UX design
- **Preflight in PC 5.8** may include: Process used to identify errors in artwork before printing (Resolution, font, images, trapping etc.)

Critical aspects

The assessment must confirm that the candidate is able to;

- Identify image resolutions, colour mode and suitable file formats
- Follow a proper packaging procedure
- Identify the appropriate printing/publishing process

The following tools, equipment & material are included within this unit.

Tools and equipment	Materials
• High-end computer system, which can support large images & graphics • Graphic Tablet • External storage device • Internet facility • Camera • Ruler • Different kinds of papers and boards, etc. • A colour-calibrated monitor • Scanner of reproduction quality • Printers – Ink jet, Bubble jet, Laser, digital printers	• Stationery item (Paper, Pencil, Colour Pencil, Ruler, Eraser)

The following documents /References/Standards may be used for this unit:

- Colour Guide
- User manuals
- Standard Operating Procedures (SOP)

Underpinning Knowledge and Skills

Underpinning Knowledge	Underpinning Skills
• Knowledge on zipping and unzipping files • Knowledge on raw file formats and process • Knowledge on Drawing theories • Measurements and Dimensions • Scanner operating procedures • Colour theory • Thorough knowledge of typography • Basic knowledge of printing process and its limitations • Type of papers and paper size • Knowledge of different kinds of substrate and relevant dot gains • Raster image editing applications • Vector graphic manipulation applications • Basic knowledge on photography • Page layouting application • Available extensions and plugins in computer software applications • Knowledge of colour management	• Computer operations • Software skills • Design skills • Handling the camera • Maintenance of an archive of images and graphics and retrieval for reproductions • Customer relations, understanding exact requirements of customers and seeking approval to the developed designs • Tonal corrections • Pulling of print proofs for customer approval • Typography skills • Typesetting skills (English, Sinhala, Tamil) • Communication skills • Identify, distinguish, colour value and use colours correctly

system • Basic knowledge in ergonomics • Occupational safety and health • awareness of computer hardware operations trouble shooting (to isolate problems when performing print designs) • Typesetting • Printing methods • Basic knowledge in optimizing the available facilities in scanners, computers, laser printers computer to plate (CTP) to design and output of a job that could be successfully reproduced within the press limitations • Basic functions of scanners, computers, laser printers /-computer to plate (CTP) • Environmental safety • Energy conservation • Ethical use and copyright law • Properties of substrates in print production	• Adapting to new technological trends
--	--

Worker behavior/Attitude

Attitude/Behavior
• Patience • Update with new technology • Problem solving • Able to take criticisms positively • Creativity • Customer handling

Unit Title:	Design and create graphics for web and other types of multimedia
Unit Descriptor:	This unit covers the competencies required to design and create web interface. It applies to the preparation of the designs publishing on web interface to suit client's requirements.
Unit Code:	D22S002U03
Element	Performance Criteria
1. Prepare a layout for web interface	1.1 Specifications of the product/scope of the product identified in the terms of reproduction method and technology involved, according to type of web and other multimedia interface 1.2 Technical issues determined according to job specifications 1.3 Appropriate software application/s selected to suit the web interface design 1.4 Layout format prepared according to web interface design concept
2. Edit enhance and manipulate graphics	2.1 Appropriate software selected according to the artwork 2.2 Images, logos, infographics and illustrations gathered according to the required resolution 2.3 Required size, colour, resolution and orientation selected according to the layout 2.4 Images cropped according to the required dimensions 2.5 Image masks prepared as required by design 2.6 Images edited/enhanced as per the required layout Media files created using timeline 2.7 Images, logos, infographics and illustrations prepared as required for the design and suitability for reproduction ensured 2.8 Images / graphics, etc. saved in separate folders in appropriate background contents, file formats and renamed according to organizational guide lines to be retrieved in reproduction process
3. Perform layout according to design concept	3.1 Web and other multimedia interface design software (Adobe XD or relevant software) selected to suit the design 3.2 Layout prepared according to design concept 3.3 Texts/images/graphics imported according to design concept 3.4 Colours, character formats, image adjustments, audio and video applied according to design concept 3.5 Preview visuals checked ensuring whether they are in-line with the industry standards and customer requirements 3.6 Customer final approval obtained for the previewed visuals

Range Statement:

Work connected to this unit may take place in an office, computer lab, or any other conducive place where the suitable digital device could be safely used. This work is carried out independently or in a team environment to predetermined standards of quality, safety procedures.

Elaboration of Terms in Performance Criteria

- **Web and other multimedia interface in PC 1.1** may include: Design of the web user interface, E-mail client design, Webbanner design
- **Technical Issues in PC 1.2** may include: Colour profile/mode, resolution, file format and size issues, device responsiveness etc.
- **Infographics in PC 2.2** may include: Graphs and charts
- **Media files in PC 2.7** may include: GIF, mp3, mp4, etc.

Critical aspects

The assessment must confirm that the candidate is able to;

- Correctly identify standard sizes, resolutions and colour
- Prepare layout according to web and other multimedia interface design concept
- Identify standard sizes of web and other multimedia interfaces
- Save locations and file formats
- Meet the client's requirement

The following tools, equipment & material are included within this unit.

Tools and equipment	Materials
• High-end computer system with internet facility, which can support images & graphics • Internal, External or cloud-based storages	• Stationery item (Paper, Pencil, Colour Pencil, Ruler, Eraser)

The following documents /References/Standards may be used for this unit:

- User manual
- Industry standards

Underpinning Knowledge and Skills

Underpinning Knowledge	Underpinning Skills
• Basic principles of web and other multimedia interface designing • Basic principles of digital image • Scanner operating procedures • Colour theory • Typography	• Computer operations • Application of graphic design softwareskills (web and other multimedia interface) • Design skills (web and other multimedia interface) • Maintenance of an archive of images

• Raster image editing applications • Vector graphic manipulation applications • Web and other multimedia interface layout design application • Available extensions and plugging in computer software applications • Basic knowledge in ergonomics • Occupational safety and health • Basic awareness of computer hardware operations trouble shooting (to isolate problems when performing print designs) • Environmental safety • Energy conservation • Ethical use and copyright law • Reproduction methods in digital media • Basic knowledge in optimizing the available facilities • Industry standards on web layout designing • Knowledge on appropriate domain and hosting	and graphics and retrieval for reproductions • Customer relations, understanding • Exact requirements of customers and seeking approval to the developed
---	--

Worker behavior/Attitude

Attitude/Behavior
• Patience • Update with new technology • Problem solving • Able to take criticisms positively • Creativity • Customer handling

Unit Title:	Handle customer care service
Unit Descriptor:	This unit covers the competencies required to communicate effectively with clients and peers. This unit includes, responding to client requests, providing of information to client, and exchanging information effectively. This unit also covers receiving and conveying information through visual and verbal media
Unit Code:	D22S002U04
Element	Performance Criteria
1. Respond to client requests	1.1 Client welcomed and requirements identified through discussion and questions 1.2 Solutions to problems identified and conveyed to client 1.3 Possible answers/solutions enhanced through real examples 1.4 Positive attitudes displayed and individual viewpoints valued 1.5 Unresolved issues referred to other sources of information or escalated for further support 1.6 Customer complaints and suggestions welcomed politely and recorded for improvements
2. Offer information to client	2.1 Information conveyed in simple language 2.2 Available resources used to enhance presentations 2.3 Current and accurate information provided to clients 2.4 Clients invited to ask questions and clarify/verify information conveyed 2.5 Additional information to enhance the client's understanding and experience provided 2.6 Necessary negotiations carried out if required
3. Exchange information effectively	3.1 Open communication used to achieve effective and purposeful exchange of information 3.2 Understanding of the information received or relayed established by questioning, checking and cross referencing 3.3 Contradictions, ambiguity identified and resolved or compromised 3.4 Implications of solutions explained to clients 3.5 Client's concerns addressed with courtesy

Range Statement:

Work connected to this unit may take place in an office, computer lab, or any other conducive place. This work is carried out independently or in a team environment to predetermined standards of quality, safety procedures.

Elaboration of Terms in Performance Criteria

Necessary negotiations may include: price, product, content, designs etc

Effective Communication Strategies may include:

- Active listening
- Positive feedback
- Two-way interactions
- Active silence
- Non-verbal positive actions
- Selection of language
- Flexibility/adaptation
- Timing
- Environment
- Convincing power

Critical aspects

The assessment must confirm that the candidate is able to;

- Personal preferences to be considered
- Feedback to ensure, that communication has taken place as desired
- Positive attitudes towards client
- Selection of courteous language

The following tools, equipment & material are included within this unit.

Tools and equipment	Materials
• Communication Devices • Communication Applications • Computer with internet facility • Calculator	• Stationery

The following documents /References/Standards may be used for this unit:

-

Underpinning Knowledge and Skills

Underpinning Knowledge	Underpinning Skills
• Principles of effective communication • Interactive techniques in communication • Adaptive Language • Personal values (own and of others) which have an impact on effective communication • Communication Devices and media	• Gathering, analyzing and interpreting data / information • Presentation skills • Active listening skills • Language competencies • Mechanism of feedback process • Soft skills • online and offline customer handling skills

Worker behavior/Attitude

Attitude/Behavior
• Politeness • Language proficiency • Way of communication

Unit Title:	Practice workplace communication and interpersonal relations
Unit Descriptor:	This unit covers the competencies required to co-operate with others, interact effectively and deal with information within the workplace.
Unit Code:	D22S002BU01
Element	Performance Criteria
1.Co-operate with others in performing work	1.1 Work performed in co-operation with others in a friendly & courteous manner 1.2 Verbal and non-verbal communication used appropriately 1.3 Ideas, opinions and interactions shared & respected appropriately 1.4 Work performed in co-operation with co-workers and related technical staff appropriately
2.Work with people of diverse backgrounds	2.1 People of a variety of backgrounds accepted without prejudice 2.2 Respect for cultural, ethnic and gender differences practised appropriately
3. Obtain record and convey workplace information	3.1 Effective questioning, active listening reading and speaking skills used to gather information 3.2 Information and ideas transferred without distortion 3.3 Work place interaction conducted in a courteous manner 3.4 Approved work instructions obtained and followed in appropriate manner 3.5 Collected information recorded for easy reference
4. Fill work related documents	4.1 Work related forms and formats identified appropriately 4.2 Range of forms and formats relating to work filled, appropriately 4.3 Reporting requirements to supervisor completed accurately in accordance with organizational guide lines and timelines.

Range statement

The performance of activities included in this unit may take place in workplace. Communication will include verbal, non-verbal, written, printed and electronic forms. It applies to individuals, groups and co-workers as well as others.

Critical Aspects:

The assessment must confirm that the candidate is able to;

- Obtaining accurate information from customer/superior/co-workers
- Accurate gathering and recording of information (Defects)
- Conveying information to relevant parties accurately

The following tools, equipment & material are included within this unit.

Tools/ instruments and equipment	Materials
• Pens/pencils/rulers/calculator • Paper/notebooks • Communication Devices	• Charts • Graphics • Memos • Formats & Forms (Time Record sheets, Quality record sheets and material order sheets)

The following documents /References/Standards may be used for this unit:

- Standard Organizational Procedures and accepted ethical standards and norms

Underpinning Knowledge and Skills

Underpinning Knowledge	Underpinning Skills
• Safety symbols & procedures • Mother tongue in both spoken and written form • Basic English relevant to workplace and type of work • Organization's rules, regulations and procedures • General norms of polite conduct • Forms of address appropriate to customers and persons in different positions • Basic knowledge of customs and practices of different ethnic and religious groups • Good telephone manners • Basic understanding of gender issues • Basic knowledge of new trends in latest technology	• Speak clearly in mother tongue and express varied ideas • Write clearly and legibly in mother tongue • Read and understand simple English relevant to the workplace • Write simple explanations in English language • Communicate effectively using the communication devices • Perform simple calculations • Make simple sketches

Unit Title:	Apply occupational literacy and numeracy
Unit Descriptor:	This unit covers the competencies required to apply literacy and Numeracy to participate effectively in activities in the workplace.
Unit Code:	D22S002BU02
Element	Performance Criteria
1. Employ basic mathematics to complete work tasks and solve problems	1.1 Computation skills demonstrated using whole numbers, fractions, decimals and percentages manually and with calculators. 1.2 Key concepts and principles of mathematics applied to understand and solve workplace calculations. 1.3 Key concepts and principles of basic geometry applied to understand their use in the workplace.
2. Communicate ideas in writing	2.1 Adequate vocabulary maintained for everyday tasks according to nature of work 2.2 Written material produced to convey intended message in familiar work context 2.3 Appropriate units, codes and symbols selected according to purpose of written material
3. Read range of written materials	3.1 Adequate vocabulary maintained to read range of written materials according to workplace requirements 3.2 Appropriate units, codes and symbols interpreted for the purpose of reading 3.3 Information gained from text integrated with own knowledge in order to create meaning

Range/Context:

Activities included in this unit may take place in workplace, and will include but not be limited to reading reports, instruction sheets, technical manuals and other types of written material in the mother tongue as well as in simple English, writing in the mother tongue and in simple English sentences, and performing simple work related to calculations employing basic mathematical operations.

Critical Aspects:

The assessment must confirm that the candidate is able to;

- Interpret written material accurately
- Convey ideas clearly and correctly in writing
- Adopt appropriate method in mathematical calculations

The following tools, equipment & material are included within this unit.

Tools/ instruments and equipment	Materials
• Pens/pencils • Paper/notebooks • Calculator	• Charts • Manuals • Memos • Formats & Forms (Time Record sheets, Quality record sheets and material order sheets) • Accepted rules of grammar and syntax • Fundamental principles of mathematics

The following documents /References/Standards may be used for this unit:

-

Underpinning Knowledge and Skills

Underpinning Knowledge	Underpinning Skills
• Grammar, spelling and syntax in mother tongue • Basic English grammar, spelling and syntax • Mathematical representation of physical quantities • Basic Mathematical operations • Adequate technical vocabulary in English • Principles of basic of Geometry • Basic knowledge of new trends in latest technology	• Write clearly, legibly and correctly in mother tongue • Read and understand simple English relevant to the workplace • Write simple sentences in English • Perform simple calculations • Draw simple Geometrical views

Unit Title :	Work in teams
Unit Descriptor :	This unit covers the competencies required to work collaboratively and in cooperation with others, and identify roles & responsibilities of members of the team.
Unit Code:	D22S002BU03

Element	Performance Criteria
1.Understand team role and scope	1.1 Formal and informal teams and their roles and limitations identified in workplace 1.2 Responsibilities, characteristics and relationship of team members explained to accomplish team goals
2.Participate as a team member	2.1 Different forms of communication used with team members to contribute to team objectives 2.2 Appropriate contribution (participation) made to the team to meet team goals 2.3 Safety of team members ensured when performed work operations appropriately 2.4 Different viewpoints and ideas respected as required to meet team goals 2.5 Collective decisions accepted as required to meet team goals
3. Maintain productive group relations	3.1 Individual's role and responsibility within the team clearly identified 3.2 Other's roles and responsibilities identified and understood 3.3 Harmonious relations maintained and respected within the team and with others

Range/Context:

The performance of activities included in this unit may take place in workplace and will include but not be limited to identifying individual's and other's roles and responsibilities within the team and maintaining harmonious relations.

Critical Aspects:

The assessment must confirm that the candidate is able to;

- Achieve team goals and individual goals
- Follow designated work plan for the job
- Respect to other's ideas

The following tools, equipment & material are included within this unit.

Tools/ instruments and equipment	Materials
Depending on the job assigned to the team for the purpose of assessing this unit, required tools, equipment and material will be provided.	- Work plans - Manuals - Handbooks - General rules and norms guiding team behavior

The following documents /References/Standards may be used for this unit:

-

Underpinning Knowledge and Skills

Underpinning Knowledge	Underpinning Skills
- Simple concepts of team behaviour - Elementary group dynamics - Basic knowledge in social and demographic structures	- Work effectively and comfortably as a member of a team - Patient - Understand others

Unit Title:	Practice occupational health and safety procedures in a workplace
Unit Descriptor:	This unit describes the performance outcomes required to identify and follow safety and emergency procedures in workplace. It involves those safety procedures to be followed when using workplace hand tools and fixed equipment It includes the individual's responsibility for safety and emergency response in the event of an accident or incident.
Unit Code:	D22S002BU04

Element	Performance Criteria
1. Identify and follow workplace safety procedures	1.1 Work place procedure relating to personal safety identified and followed 1.2 Unsafe situations and hazards/risks identified and reported according to workplace 1.3 Machinery and equipment breakdowns identified and reported according to workshop procedures 1.4 Fire hazards are identified, different fire protection equipment and material and their methods of use identified as required for different types of fires 1.5 Work place procedures and safety requirements for handling machines and equipment identified and followed 1.6 Manual handling procedures and ergonomic parameters identified and followed 1.7 Health and Safety awareness programmes participated 1.8 First aid procedures performed as needed 1.9 Daily and weekly safety & health check list followed as per organization requirement
2. Identify and follow workplace emergency procedures	2.1 Mechanical, electrical, hazards recognized, identified and reported promptly. 2.2 Workplace emergency procedures regarding illness and accidents are identified and followed 2.3 Safety warning alarms and workplace evacuation procedures, emergency protection area and fire exits identified and followed 2.4 Firefighting appliances and equipment located and identified for emergency use and application 2.5 Relevant persons identified for contacting in the event of an incident, accident or sickness of self, co-workers, staff, customers and others 2.6 Accident and incident documentation requirements followed work place procedures

Range/Context:

Activities included in this unit may take place in a work place, and will include but not be limited to identifying potential hazards, taking effective preventive action to control or minimise such hazards, using personal protective equipment, using fire extinguishers and maintaining records of safety related activities.

Elaboration of terms:

Workplace procedures must include procedures for:

- Selecting and using personal protective equipment (PPE)
- Identifying hazards
- Emergency, fire and accident

First aid procedures may include but not be limited to treatment of minor cuts, bruises and burns, applying bandages and tourniquets, and neutralising the effects of corrosive substances.

Relevant persons must include:

Those holding a current recognized qualification in any of the following:

- First aid
- Cardiopulmonary resuscitation
- Fire warden and workplace evacuation
- Occupational or work health and safety representative.

Critical Aspects:

- Identify potential hazards
- Adhere to safety procedures
- Use most appropriate tools for a task

The following tools, equipment & material are included within this unit.

Tools/ instruments and equipment	Materials
• Safety signs and symbols • Posters • Coloured barricaded tape and paint • Machine and safety devices • First aid box with essential items • Fire protection equipment	•

The following documents /References/Standards may be used for this unit:

- Organisation's health & safety procedure manual
- Factories' Ordinance No.45 of 1942 and its amendments

Underpinning Knowledge and Skills

Underpinning Knowledge	Underpinning Skills
Individuals must be able to demonstrate knowledge of: basic aspects of relevant OHS legislation, including: • Employer responsibilities for workplace • Employee responsibilities to participate in health and safety practices • Employee responsibility to ensure own work practices protect the safety of self, other workers and other people in the workplace roles of work place personnel personal safety in workshop, including: • Eye protection manual handling, including: • Storing items work place practices, including: • Observing personal and surrounding hygiene • Identifying slip hazards and trip hazards OHS symbols and signs, Machine and equipment safety, including: • Electrical tools, including: - Checking before use faulty equipment tagging and isolation procedures - Dangers of using electrical tools around water • Electrical Hazards emergency procedures, including: • Personnel responsibilities • Evacuation procedures and assembly points.	• Learning skills to: Locate sources of information relating to safety requirements. • Reading skills to: Interpret information from manufacturer and literature when seeking procedures required carrying out work safely. • Writing skills to: Legibly and accurately enter information into work place safety documents and check sheets. • Oral communication skills to: Clarify instructions inform personnel of work place hazards. • research and development skills • Planning and organizing skills to: Plan own work requirements to achieve required outcomes while working according to safety requirements. • Self-management skills to: Follow work place safety requirements without constant supervision identify and look after own safety. • Problem solving skills to: recognize when unsure of safety procedures and seek help Recognize potential workplace hazards and take action.

**COMPETENCY BASED TRAINING CURRICULUM
FOR
GRAPHIC DESIGNER
NVQ Level 4**

List Of Curriculum Modules		Module Code No.	Duration		Page No
			Theory	Practical	
1.	Introduction to graphic design	D22S002M01	21	12	28
2.	Introduction to computer hardware & software	D22S002M02	06	15	29
3.	Colour theory and input images	D22S002M03	21	12	30
4.	Visual media technology fundamentals	D22S002M04	27	15	31
5.	Creative thinking and sketching	D22S002M05	27	45	32
6.	Typography	D22S002M06	09	21	33
7.	Edit and manipulate images	D22S002M07	48	102	34
8.	Illustrations	D22S002M08	48	102	36
9.	Layout Designing for printing and publishing	D22S002M09	30	120	37
10.	Layout designing for web interfaces	D22S002M10	30	30	38
11.	Handle customer care service	D22S002M11	06	06	39
12.	Communication skills for workplace	D22S002BM01	06	06	40
13.	Workplace calculation and science	D22S002BM02	42	18	41
14.	Team work	D22S002BM03	02	06	42
15.	Occupational safety & health and environmental aspects	D22S002BM04	09	11	43
			332	521	
Total hours			853		

Competency Profile

GRAPHIC DESIGNER

COMPETENCY AREAS

COMPETENCIES

A. Develop sketch	1. Collect information	2. Analyze gathered information	3. Develop mind map	4. Develop mood board	5. Design sketch
B. Design and create graphics	1. Type manuscript	2. Edit and enhance images	3. Manipulate images	4. Produce illustrations	5. Prepare layout design for print/publish
	6. Prepare layout for web interfaces				
C. Handle customer care service	1. Respond to client requests	2. Provide required information	3. Collect customer feedbacks	4. Obtain the client's approval	

Programme Structure

Competency Area		Module		Competencies	Time	
		No.	Title		Institutional	
					Theory	Practical
	Basic Module (Technical)	M01	Introduction to Graphic Design		21	12
		M02	Introduction to Computer Hardware & Software		06	15
		M03	Colour Theory and input images		21	12
		M04	Visual Media Technology Fundamentals		27	15
A	Develop sketch	M05	Creative thinking & sketching	A01, A02, A03, A04	27	45
B	Design and create graphics	M06	Typography	B01	09	21
		M07	Edit and manipulate images	B02, B03	48	102
		M08	Illustrations	B04	48	102
		M09	Layout Designing for print/publish	B05	30	120
		M10	Layout designing for web interfaces	B06	30	30
C	Handle customer care service	M11	Handling customer care service	C01, C02, C03, C04	06	06
		BM01	Communication skills for workplace		06	06
		BM02	Workplace calculation and science		42	18
		BM03	Team work		02	06
		BM04	Occupational safety & health and environmental aspects		09	11

Mapping Table

Module Title	Introduction to graphic design
Module Code	D22S002M01
Module Type	Basic module
Duration (Hrs.)	33 Hours (21 – Theory, 12 – Practical)
Learning Outcomes	After completion of this module the trainee will be able to: - Design a sketch using design fundamentals - Recognize Vector & Raster Graphics
Learning Content	Theory: • What is Graphic Design? ◦ History • Pipeline, Role and Responsibilities of the Graphic Designer • Examples of Graphics • Vector & Raster Graphics • Design Fundamentals ◦ Basic Elements (lines, shape, form, space, texture, colour, value etc.) ◦ Principles of design ◦ Design hierarchy ◦ Basic colour modes Practical: • Gather photographs under basic elements/ principles • Group Activity: Power-point/ video presentation on design fundamentals
Teaching-Learning activities	• Assignments • Illustrated talk • Demonstrations
Forms of assessment	Formative Assessment + Summative Assessment

Module Title	Introduction to computer hardware and software
Module Code	D22S002M02
Module Type	Basic module
Duration (Hrs.)	21 Hours (06 – Theory, 15 – Practical)
Learning Outcomes	After completion of this module the trainee will be able to: - Set up the computer individually - Download relevant software and install all system and graphic software - Set up any devices related to the requirement - Arrange the workplace environment suitably - Troubleshoot the device - Identify new trends, technology, internet and new media
Learning Content	Theory: • What is computer hardware & software • History of computer • Introduction to hardware specifications for Graphic design • Introduction to World Wide Web (www) and new media • New trends & technology • Storage devices (online & offline) • Computer hardware & software installation ○ Booting ○ Power supply & connections ○ Network types ○ Workplace environment Practical: • Separate and fit together all parts of the computer system (understand the cabling and connections etc.) • Format the computer • Install application and system software (virus guard, graphic designing software, other related software etc.) • Install computer peripherals
Teaching-Learning activities	• Assignments • Illustrated talk • Demonstrations
Forms of assessment	Formative Assessment + Summative Assessment

Module Title	Colour theory and input images
Module Code	D22S002M03
Module Type	Basic module
Duration (Hrs.)	33 Hours (21 – Theory, 12 – Practical)
Learning Outcomes	After completion of this module the trainee will be able to: - Identify and apply colour theory and psychology on a design - Identify and correct colour gamut
Learning Content	Theory: • Colour theory ○ History of colour ○ Introduction to colour wheel ○ Warm colours and cool colours ○ Colour psychology ○ Importance of selecting appropriate colour/s • Colour themes ○ Using spot colours • Basic colour management ○ Colour correction ○ CIE colour gamut ○ Introduction to ICC profiles • Printing, web and video colour spaces • sRGB, CMYK, Adobe RGB, Pro-photo, REC601, REC709, REC2020 ○ Identifying and correcting out of gamut colours ○ Coated and uncoated papers ○ Introduction to colour management Practical: • Prepare a presentation/ booklet on selected industrial advertisements, packaging and logos according to colour wheel, colour psychology and colour themes
Teaching-Learning activities	• Assignments • Illustrated talk • Demonstrations
Forms of assessment	Formative Assessment + Summative Assessment

Module Title	Visual media technology fundamentals
Module Code	D22S002M04
Module Type	Basic module
Duration (Hrs.)	42 Hours (27 – Theory, 15 – Practical)
Learning Outcomes	After completion of this module the trainee will be able to: - Identify the printing method - Identify the graphic software for vector and raster graphics - Identify the fundamentals of printing technology
Learning Content	Theory: • Design Technology ○ Pixel, resolution, bit depth, screen sizes, art board, aspect ratios, frame rates ○ Introduction to Vector & Raster graphics ○ File formats and universal file formats ○ Import, export and rendering technology ○ Introduction to encoders, decoders and broadcasting formats ○ Understanding of vector and raster typography formats • Fundamentals of printing technology ○ Types of printing ○ Introduction to printing process ○ Introduction to publishing and e-publishing ○ Printing and finishing methods ○ Paper materials and gauge (GSM) ○ Finishing • Binding • Laminating • Foiling • Die-cutters etc. • Introduction to vector & raster software • Introduction to media convergency Practical: • Presentation on printing and publishing
Teaching-Learning activities	• Assignments • Illustrated talk • Demonstrations
Forms of assessment	Formative Assessment + Summative Assessment

Module Title	Creative thinking and sketching
Module Code	D22S002M05
Module Type	Core module
Duration (Hrs.)	72 Hours (27 – Theory, 45 – Practical)
Learning Outcomes	After completion of this module the trainee will be able to: - Create a mood board according to the client's requirement - Identify light and shading relevantly - Create a logo using mind mapping according to the client's requirement
Learning Content	Theory: • Creative thinking ○ Idea generation ○ Brain storming ○ Mind mapping ○ Mood boards creation • Sketching ○ Type of pencils and papers ○ Basic lighting ○ Light and shading ○ Perspective drawing • Concepts of marketing ○ Introduction to Marketing ○ 6Ps ○ Branding ○ Market group ○ Marketing Ethics • International Design Exposure ○ Online – “Ad of the world” website ○ Offline – International newspapers and magazines Practical: • Sketch a perspective drawing for given basic geometrical objects • Develop a mood board • Sketch for an artwork according to creative thinking • Collect international design samples • Assignment: Redesign a logo for a selected product / organization / market group
Teaching-Learning activities	• Assignments • Illustrated talk • Demonstrations
Forms of assessment	Formative Assessment + Summative Assessment

Module Title	Typography
Module Code	D22S002M06
Module Type	Core module
Duration (Hrs.)	30 Hours (09 – Theory, 21 – Practical)
Learning Outcomes	After completion of this module the trainee will be able to: - Identify font variations on a graphics - Converting Unicode to FM, FM to Unicode - Insert special characters for a text body
Learning Content	Theory: • Introduction to typography • Evolution of typography • Categories and font families • Anatomy of types • Unicode fonts, FM fonts • Converters, speech-to-text, Optical Character Recognition (OCR) ○ Online ○ Offline • Typing speed practicing (Sinhala, English, Tamil languages) • Insert characters using character map, special characters, symbols, language linked software etc. • Character and paragraph formatting • Proof reading marks Practical: • Type manuscript • Collect designed samples (paper article, product, greeting card, logo etc.) and identify typefaces and fonts
Teaching-Learning activities	• Assignments • Illustrated talk • Demonstrations
Forms of assessment	Formative Assessment + Summative Assessment

Module Title	Edit and manipulate images
Module Code	D22S002M07
Module Type	Core module
Duration (Hrs.)	150 Hours (48 – Theory, 102 – Practical)
Learning Outcomes	After completion of this module the trainee will be able to: - Crop, edit and enhance images - Apply adjustments, effects and filters for images - Retouch and adjust colour for images - Select methods, tools and refine edges - Apply masks to images - Import, export and create 3D images with texture maps - Edit video, animation using time line
Learning Content	Theory: • Import images • Cropping, resizing according to the artwork • Methods of selecting • Retouching • Pen tool and paths • Layers, Adjustment layers, smart object • Masking ○ Layer mask ○ Clipping mask ○ Vector mask • Blending modes • Colour and tonal adjustments • Lights adjustments • Image manipulation • Filters, effects • HDR, panoramic image creation • Raw image processing (Camera raw basic) • Creating simple 3D object • Import and export '.obj', '.fbx', etc. object and create a texture with bump and normal map • Create a title card with alpha channel • Colour management, colour correction and grading • Create a small GIF using time line (frame animation) • Save and export files for printing, publishing and other media Practical: • Retouch and enhance damaged images • Background changing, manipulating and colour grading • Create a Thank you card

	• Develop a matte painting using images, 3D objects etc.
Teaching-Learning activities	• Assignments • Illustrated talk • Demonstrations
Forms of assessment	Formative Assessment + Summative Assessment

Module Title	Illustrations
Module Code	D22S002M08
Module Type	Core module
Duration (Hrs.)	150 Hours (48 – Theory, 102 – Practical)
Learning Outcomes	After completion of this module the trainee will be able to: - Create an illustration using basic shapes or pen tool and use colour, gradient, mesh - Design an artwork using type tool, brushers, transformations, masking, pathfinder and tools - Create a perspective drawing - Create a 3D object and use mapping - Finalize artwork for appropriate media
Learning Content	Theory: • Page dimensions, art board, colour mode, bleed margin • Fill, stroke, gradient, swatches • Basic objects • Transformation tools (Align and Distribute, Flip, Folding, etc.) • Pen tool, pathfinder, shape modes • Clipping mask • Blending tools, mesh tools, warp tool, shape builder, graphs etc. • Brushers, symbols, graphic styles • Type tool (horizontal, vertical, on path, on shape, warp, create outline) • Perspective drawing (one point, two point) • Revolve and extrude (3D) • Effects, rasterize, expand • Crop marks, trim marks, registration marks • Colour separation • Save and export files for printing, publishing and other media Practical: • Create a logo, visiting card, letterhead, envelop, CD covers according to the designing concepts • Create a brochure and pack design according to the relevant printing methods • Create a new media post
Teaching-Learning activities	• Assignments • Illustrated talk • Demonstrations
Forms of assessment	Formative Assessment + Summative Assessment

Module Title	Layout designing for printing and publishing
Module Code	D22S002M09
Module Type	Core module
Duration (Hrs.)	150 Hours (30 – Theory, 120 – Practical)
Learning Outcomes	After completion of this module the trainee will be able to: - Design any type of page layout - Design a booklet accurately and efficiently - Select correct measurements according to the requirement - Select the appropriate file format - Select the appropriate text formatting using typography methods - Plan the layout for final printing and publishing
Learning Content	Theory: • Introduction of page layout designing • Set up documents (margins, page sizes, screen sizes, bleed margin, measurement, etc.) • Pages, master pages • Page numbering • Introduction to importing text (Text flowing tools) and graphics, link file, data merge • Formatting texts • Grid system • Apply colours and effects • Making tables • Transform graphics (Align and Distribute, Flip, Folding, etc.) • Text wrap • Pathfinder • Working with style sheet • Making foot notes and end notes • Create content page • Combine documents using book • Preflighting • Create outline • Packaging • Save and export files for printing, publishing and other media Practical: • Design a newspaper/magazine spread sheet • Design and print a booklet • Design annual report for a selected organization
Teaching-Learning activities	• Assignments • Illustrated talk • Demonstrations

Forms of assessment	Formative Assessment + Summative Assessment
----------------------------	---

Module Title	Layout designing for web interfaces
Module Code	D22S002M10
Module Type	Core module
Duration (Hrs.)	60 Hours (30 – Theory, 30 – Practical)
Learning Outcomes	After completion of this module the trainee will be able to: - Illustrate design ideas using storyboards or Wireframes - Design web banners for responsive sizes - Design a graphic user interface element - Design web interfaces for responsive sizes - Design a complete layout for web interface
Learning Content	Theory: • Introduction to web and other multimedia layout designing • Layout designing tools (Adobe photoshop, Adobe XD, Sketch, MockFlow, etc.) • Colours for web layout • Website responsive sizes • Import and export images, GIFs, videos, URLs, icons • Image sizes and formats for web layout • Slicing images for web layout and insert URL • Margin, spacing and designs • Designing graphic user layout elements (menus, tabs, shapes, buttons, grids, etc.) • Create web layout using storyboard or Wireframe • Create web layout and prototype Practical: • Design a web layout for a selected industry sector according to the client's requirement • Resize the designed web layout into mobile view
Teaching-Learning activities	• Assignments • Illustrated talk • Demonstrations
Forms of assessment	Formative Assessment + Summative Assessment

Module Title	Handling customer for designing purposes
Module Code	D22S002M11
Module Type	Core module
Duration (Hrs.)	12 Hours (06 – Theory, 06 – Practical)
Learning Outcomes	After completion of this module the trainee will be able to: - Familiarize on customer service provided - Respond to feedbacks
Learning Content	Theory: • Introduction to Customer Service • Introduction to Communication ○ Basic communication model ○ Importance of Verbal communication ○ Other Channels ▪ e-mails ▪ Text Messaging ▪ Chat ▪ Social Media ▪ Futuristic Channels • Handling inbound and outbound customer interactions ○ Telephone etiquettes • Resolving issues in customer service ○ Customer approval procedure ○ Idea negotiations ○ Collecting and recording feedbacks Practical: • Role play: develop a mind map and obtain approval based on customer requirement • Practice call simulations
Teaching-Learning activities	• Assignments • Group activities • Role plays • Illustrated talk • Demonstrations

Module Title	Communication skills for workplace
Module Code	D22S002BM01
Module Type	Basic module
Duration (Hrs.)	12 Hours (06 – Theory, 06 – Practical)
Learning Outcomes	After completion of this module the trainee will be able to: - communicate ideas and information at the workplace effectively
Learning Content	Theory: • Listening skills • Telephone etiquettes • Presentation skills • Verbal and non-verbal communication • Safety symbols & procedures • Basic English relevant to workplace and type of work • Organization's rules, regulations and procedures • General norms of polite conduct • Forms of Different manner of address appropriately to customers, superior and subordinates and persons in different positions • Customs and practices of different ethnic and religious groups • Gender issues relevant to the communications • Trends in related technology • Friendliness through a friendly tone, a personal question, or simply a smile, encourage coworkers to engage in open and honest communication • Respect – convey respect for others and their ideas Practical: • Role plays and dramas • Assignments 01 - Provide opportunities to trainees to present learned content • Assignments 02 – Prepare list of 250 – 300 technical / vocational terms in English used in relevant industry during the course period • Assignment 03 – Collect manufacturers guidelines/ operational instructions / specifications in relevant field, prepare a file and interpret the information
Teaching-Learning activities	• Assignments • Illustrated talk • Demonstrations • Role play & Drama
Forms of assessment	Formative Assessment + Summative Assessment

Module Title	Workshop calculation & Science
Module Code	D22S002BM02
Module Type	Basic Module
Duration (Hrs)	60 Hours (42 – Theory, 18 – Practical)
Learning Outcomes	After completion of this module the trainee will be able to: - perform basic arithmetic and trigonometric operations in the workplace when and where required. -Describe electrical and mechanical characteristics
Learning Content	Theory • Basic Arithmetic. • Area, Volume • Basic trigonometry and angles. • Units and Measurements (Length, Volume, Speed, Time). • Conversion from metric to imperial and vice versa. • Basic idea in real world forces • Properties of Materials – • Units & measurement: Description, care & use of :- Micrometers- Outside and depth micrometer, Micrometer adjustments, Vernier calipers, densitometer, magnifying glass • Technical Drawings: Geometric Construction, preparing development of surface, Concept of true length - Development of simple solids like cubes, prisms, cylinders, pyramids, cones. Practical • Practice arithmetic and trigonometric operations • Practice measuring • Practice drawing
Teaching-Learning activities	• Illustrated talk • Demonstrations • Group and individual practices • Use video clips • Assignments
Forms of assessment	Formative Assessment + Summative Assessment

Module Title	Team work
Module Code	D22S002BM03
Module Type	Basic Module
Duration (Hrs)	08 Hours (02 – Theory, 06 – Practical)
Learning Outcomes	At the end of this module student should be able to; • Contribute positively to the work in team environment • Work effectively with others in a socially diverse environment • Respect and understand the views of others • Give, receive and act upon feedback • Identify and describe own roles and roles of others
Learning Content	Theory: • Simple concepts of team behavior • Elementary group dynamics • Basic knowledge in social and demographic structures Practical • Identify and establish team purpose, team member's roles and responsibilities. • Coach and motivate team. • Assignment 01- Form a group for workspace cleaning and maintenance, waste management and give the feedback on group effort • Assignment 02- Arrange sports activities / social events
Teaching-Learning activities	• Assignments • Lecturers • role plays • case studies • team building activities • coaching and mentoring
Forms of assessment	Formative Assessment + Summative Assessment

Module Title	Occupational safety & health and environmental aspects
Module Code	D22S002BM04
Module Type	Basic Module
Duration (Hrs)	20 Hours (09 – Theory, 11 – Practical)
Learning Outcomes	After completion of this module the trainee will be able to: - describe importance of safety - arrange the place to minimize health risk - give first aid - Recognize and apply environmental aspects
Learning Content	Theory • Importance of Safety and general Precautions to be observed in the workspace. • safety signs - for danger, warning, caution & personal safety message, emergency numbers • Safe handling of, Fire extinguishers used for Different types of fire. safe handling and, Energy Conservation • Types of waste materials • Environmental rules and regulations on disposal of waste into environment • Method of reuse of waste Practical • Practical related to Safety and Health, • Importance of maintenance and cleanliness of workspace. • Demonstration on First aid and Fire safety, • Arrange the place of work in order to make it possible to work in the most ergonomic way. • Use of fire extinguishers. • Demonstration on safe handling of equipment • Energy saving Tips
Teaching-Learning activities	• Illustrated talk • Use video clips • Demonstrations • Assignments
Forms of assessment	Formative Assessment + Summative Assessment

Assessment Guide:

Forms of assessment

Assessment shall be based on evidence collected through workplace performance or a combination of evidence collected through training and work place performance.

Assessment context

This unit may be assessed on the job, off the job or a combination of on and off the job. The unit may be assessed individually.

Assessment conditions

The candidate will have access to:

- all tools, equipment, material and documentation required.

The candidate will be permitted to refer the following documents:

- material, paint and polish safety data sheets
- health and safety regulations
- product data sheet (PDS)
- company specification sheets
- manufacturer's instructional brochures and manuals

The candidate will be required to:

- orally or by other methods of communication, answer questions asked by the assessor.
- identify superiors and clients who can be approached for the collection of competency evidence where appropriate.
- present evidence of credit for any off job training related to this unit.

Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria and that he/she possess the required underpinning knowledge.

Special notes

During assessment, the candidate will;

- demonstrate safe work practices at all times
- communicate information about processes, events or tasks being undertaken to ensure a safe and efficient working environment.
- perform all tasks in accordance with standard operating procedures.
- perform all tasks to specifications
- take responsibility for the accuracy of his/her own work
- use accepted methods for calculation.

Tasks involved will be completed within reasonable time frames relating to typical workplace activities.

Resources required for assessment

These include material, tools and equipment listed within this unit

Tools, equipment and material required for the training programme

(Approximately 15 students)

No	Item	Quantity
1	Stationery (Paper, Pencil, Colour Pencil, Ruler, Eraser)	As required
2	Different kinds of papers and boards, etc	As required
3	High-end computer systems, which can support large images & graphics	15
4	Graphic Tablets	15
5	Camera (DSLR camera with accessories)	01
6	Scanner of reproduction quality	03
7	Printers – Ink jet, Bubble jet, Laser, digital printers	02
8	Internet facilities	15
9	Required Software (Vector / Raster graphic, etc.)	15
10	Online / Offline (Internal/External) storage devices	15
11	Presentations (Digital/Printed)	15
12	Concept development tools	15
13	Communication Devices	03
14	Calculator	15
14	Charts	15
15	Graphics	15
16	Memos	15
17	Formats & Forms (Time Record sheets, Quality record sheets and material order sheets)	15
	.	

NATIONAL COMPETENCY STANDARDS & COMPETENCY BASED TRAINING CURRICULUM For GRAPHIC DESIGNER NVQ Level 04 (Competency Standards Code: D22S002)	
NATIONAL CERTIFICATE LEVEL 04 IN THE OCCUPATION OF GRAPHIC DESIGNER	
1. Endorsement Date:08.04.2025	2. Date of Review: 08.04.2028
3. Purpose of the Qualification	To certify that the holder of this qualification has acquired the competencies contained in the units listed in section 5 below.
4. Regulations for the Qualification/s	The holder should have been assessed by a licensed assessor and found competent in the units listed in section 5 and certified by the TVEC
5. Qualification Codes & Packages	• U01 + U02 + U03 + U04 + BU01 + BU02 + BU03 + BU04 - D22S002Q1L4 (Graphic Designer)
6. Prerequisites	None
7. Accreditation Requirement	The qualifications shall be offered in compliance with the accreditation requirements of the TVEC as stipulated in the National Vocational Qualifications framework of Sri Lanka.
8. Certification	TVEC shall certify the qualifications in terms of the regulation at section 5 above.
9. Transition arrangements	The competency-based assessments shall be undertaken by the registered assessors of the TVEC.
10. Requirement of conducting Knowledge Assessment	Not required
11. Contact for Comments	Chairman, National Apprentice & Industrial Training Authority, 971, Sri Jayewardenepura Mawatha, Welikada, Rajagiriya. Director General, Tertiary & Vocational Education Commission, 354/2, Nipunatha Piyasa, Elvitigala Mawatha, Colombo 05.

ACKNOWLEDGMENT

Original

Overall Direction

Mr. Hector Hemachandra	Project Director Technical Education Development Project
Mr. Amal Senalankadhikara	Chairman National Apprentice & Industrial Training Authority
Dr. T.A.Piyasiri	Director General Tertiary & Vocational Education Commission

Technical Support

- Mr. David Kay, International Consultant
- Mr. C. B. Fernando, Consultant
- Mr. Chandana Weerasinghe, Premadasa Group of Company, Jayantha Weerasekara Mawatha, Colombo 10.
- Mr. Sisira Wijethunge, Managing Director, Sisira Wijetunga Graphics (Pvt) Ltd., Kotte.
- Mr. Prasanna Karunathilaka, Universal Packaging Ltd., Dungamugoda, Road Kelaniya
- Mr. A.T.G. Claude Perera, Director, Ceylinco Packaging Ltd. 257, Union Place, Colombo 02.
- Mr. Sujeewa Randeniya, Director, Sri Lanka Institute of Printing Dr. Danister de Silva Mawatha, Colombo 08. - Industry advisory group and NITAC
- Mr. W.A.P. Nanayakkara, Dept. of Government Printing. - NITAC
- Mr. M.C. Premasinghe, Dept. of Government Printing. - NITAC
- Mr. M.W. Karunaratne, Karunaratne and Sons Ltd. Colombo 10. -NITAC
- Mr. Madawa Vidyaratne, Sri Lanka Export Development Board. -NITAC
- Mr. Ashoka Jayasinghe, Printers Association, 341, Olcott Mawatha, Colombo 01. - NITAC
- Mr. S.H.F.M. Zakir Hussain, Zak Advertising Ltd. Colombo 10. -NITAC
- Mr. W.I.C.D.R. Fernando, Dept. of Labour. - NITAC
- Mr. M.G. Amarasinghe, TVEC. - NITAC
- Mrs. D.C. Wahalathanthri, NAITA - NITAC
- Mrs. Vajira Imbulana, NAITA - NITAC
- Mr. R.A.N.C. Gunathilake, NAITA - NITAC
- Mr. G.D.D. Ekanayake, Co-ordinator, SDP - NITAC
- Mr. Aruna Wickramarachchi, Manager - Design, Wijaya Newspapers Ltd, Colombo 02
- Mr. N.T.S. Kodikara, Head of the Division -Commercial Printing, The Associated Newspapers of Ceylon Ltd, Colombo 10
- Mr. Ajith Jayamanne. Proprietor, Scan Graphics, Kandy Road, Kadawatha
- Mrs. Thanuja Siriwardena, Instructor, Sri Lanka Institute of Printing, Dr. Danister de Silva Mawatha Colombo 02
- Mr. Ajith Mendis, Manager (Pre-press), Ceylinco Printing and Stationery, Orugodawatte, Walampitiya

- Mr.Asoka Nanayakkara,Director Studies, Sri Lanka Institute ofPrinting Colombo 10 - NITAC

Technical Support

- Mr. L.D.P. Wimalarathne,Additional Manager (Printing), Wijaya Newspaper Ltd.,Hunupitiya Cross Road, Colombo 02. - NITAC
- Mr.L.B.C. Jayavilal , Director (Human Resources Development) State Printing Corporation, Pannoluwa Padukka- NITAC
- Mr.Shantha Kumara , Superintendent (Binding Section) State Printing Corporation, Pannoluwa Padukka -NITAC
